Later, AutoCAD was licensed to several other software manufacturers, including Autodesk. It continued to be updated throughout the years, with the latest versions of the software being released in 2016 and 2017. AutoCAD development Autodesk's primary goal for AutoCAD is to provide a platform for the creation of CAD drawings that are easy to modify and update. Many people use AutoCAD to create original designs for houses, offices, and other projects. The software includes a user interface that can be navigated by using a mouse, trackpad, or a stylus, and it can be operated on personal computers and mobile devices.
