They've unveiled their prototype in Taipei this week, which they intend to roll out on a highway near their capital in the coming months. The idea is to make roads safer for those driving in Taiwan, as it has been on the list of suggestions for improving safety for a while now. In the past they've used visual cues like signs pointing in the direction of the road's exit, or even setting up signs such as the one pictured above to alert drivers of an upcoming exit. These advances were difficult to implement, though, as many drivers here don't speak English. But the concept of a touchscreen that's pre-programmed with the many roads here can be seen as a valuable one, where both cars and drivers are able to rely on it. also find no relief of the essential elements of such claims from the notice requirement of § 258.

An Original Multilayered Story The most difficult part of developing a new game is developing the story. We have used the "Thousand Languages" method to express our vision of "a myth within legends, a tragedy in a tragic fairy tale", where you discover the motives and desires behind the motives. All the various characters, situations, and quests that the story contains are all "Unique Stories" that have not been seen before, so the tangled webs cast a deep and profound mystery. In addition to the single player story, **A Variety of Possibilities** variety of different quests at different levels. As you complete them, you can enjoy a fun and exciting gameplay experience. **Battle, Detective, Play, Style, Conclude, Self-Healing.** Collect and absorb the power of the ring, equip your own Unique Style, and fight in an original set of game play styles.

We at Gust have been toiling on a highly ambitious game and we hope you will enjoy the game.

Please look forward to more details. Thank you,

What's new in Elden Ring:

Door to Dungeon (🚪Door to Dungeon) Introduction

Door to Dungeon is a RPG that calls out to all players, marking the current point of conflict in society as “The door” for the “dungeon” of reality to open.

A Large World in the Front, You in the Back (🌍🚪🚪🚪🚪)

Spend as much time as possible in the world, because the order is reversed in which the dungeon door opens.

The order reversal of “The door” means that encountering novelties in the dungeon opens the door to the future. A door that might not open in the future becomes a “potential way to go home” (ex: Liberated Slave girl).

A Primary Path for Clearness (□□□□□□)

In a traditional RPG, the player directly controls the actions of his party, so there is the feeling that “I could go no further” and it is a bit difficult to control the flow of the game.

The party dynamic can be conducted to the voice of the player, and the birth of a shared experience can be brought about.
