What's new in Tiger Fighter 1931 MP090:

« Rise of Keepers » Disenchanted with the current way of life, a set of heroes lead the others to the mystical moors to discover what their true destiny is. Their task is to step into a world that defies entropy, fight off the minions, and take charge of the most dangerous experiments on Earth. Session 1 The bulk of the heroes arrive in the area of their scheduled rendezvous. A small quiet room without spatial orientation. They seem to be safe for the moment, although the other side of the door keeps opening and closing by itself. All light sources are off, since beacons aren't quite accurate. Some semblance of choice: two containers at the end of the hall. One holds an experimental gun weapon, unconceivable composition, simply huge. For a moment I distract the threat by waving a torch to try to make the firing mechanism work. The second one contains teflon-lined gearbox filled with tightly packed chemicals, and a helmet. Next I grab the gun. As soon as I touch it, it starts firing because someone's pressed the trigger. I will have to look for a quieter way to use it. The boxes could be doors. In that case to discover what's behind them is the priority. I see a niche at the far end of the hall, standing against the wall. It's a good idea, in fact, but for now I can deal with glass cases one at a time. The glass slides at every touch, but locks won't open. I'll need a long time and some gadgets to open them. The trip to the niche is prone to attract heroes, so I agree to meet in the room that's currently empty. Barbochez enters and allows me to explain the decision. He says it couldn't be avoided but either way, the danger is that ever more people will join. I can only hope that no hero among them understands the dangers much better than the rest, but I'm stuck with my hunch that one of the heroes has already contacted Aurelia on the ground. I have to think about that a lot during the break. I dig in my backpack and make an attempt to trigger the gadgets to open the case, but it doesn't work at all. When it's concluded with a success I prepare to meet Carla
