But motion capture technology isn't just used for the gameplay. The technology collects data from players through the Player Impact Engine as they're faced with complex scenarios during training drills at the Real Madrid Training Centre, composed of over 30 sequences. While a mock match is played to measure the data, players using a motion capture suit are required to act and react to situations presented within. When used for training, the technology can be used to improve player awareness and perception. For example, once players have experienced being tackled by an opponent and feeling their body make contact with another player, they can see their body work differently in a real environment. What's in Fifa 22 Cracked 2022 Latest Version? We asked FIFA's Mark Rosin to give us his idea of some of the features that he's most looking forward to in FIFA 22. First, would you like to share your thoughts on the game's enhanced player reaction system, OptiZone? The quicker the ball comes to you, the better you can strike at it. Players will be able to react to crosses, through balls, lost balls, and attempted through balls. Players have access to multiple options for reactions including offensive, defensive or neutral. This is the first in the series to include the fluidity of the ball. With the ball in the air, players can vary their movement pattern to evade a shot and to catch the ball with two hands and keep possession to set up teammates. OptiZone's AI-controlled defenders can be switched on or off for specific scenarios. Each defender will have a different set of movement modes based on the strength of the player as well as their fatigue. For example, a player will have a tougher time reading the movements of an attacker that is fresh. Also, when the defender is switched on, it will have access to Vision of the Ball, which will allow it to see the ball in front of it, as well as the position of its teammates. This will make it easier to predict attacks, whether they come from the right, left or through the centre. A player's interaction with the ball will also be improved. For example, when a player controls the ball and runs down a left-footed through-ball, their player can attempt to shift-hit a volley shot past the goalkeeper, or will have the option to hit a cross-shot to get the ball into the box.

What's new in Fifa 22:

- **Microsoft Pass makes mobile game-playing easier.**
- **Fun with football - FIFA 22 lets you share humorous clips of what happens when a player breaks formation.**
- **A hooligan lookalike chases you through the streets of London as you try to reach your hotel before the match.**
- **Defensive Player of the Year award.**
- **New Kicks - add a new spark to passing with the new Kicks system. It lets you exploit space and give teammates free reign to spread the ball. An improved free kick system lets you find free space to cross or make long runs, and everything is managed perfectly to improve your team's passing game.**
- **New free kick system - in addition to the traditional free kicks, you can now place an improved free kick just inside the penalty box, in the centre of the goal.**
- **FIFA Best XI player Photo Mode - The Best XI will be selected from the top 11 players in the FIFA 22 Pro-rated player ratings. FIFA Best XI players will appear in the player photos.**
- **Improved Goalkeeper AI - goalkeeper performance is more intelligent, making smarter decisions in front of goal in key moments, and working harder when coming for a ball, and challenging shots.**
 - **New goalkeeper moves - added diving catch, punching headers, rolling out with ball and darting off track.**
 - **Improved crossing and shots - smart positioning on the field, improved following and shooting, on-ball decision-making, and on-target passes in crucial moments.**
 - **Deeper keeper dives - improved depth, accuracy, position and timing with dives.**
- **New Skill Games - with FIFA 20, there were added Franchise games, which let you play specific scenarios and challenge your technique as a player or coach.**
- **Unmatched Control - the new ball physics system allows players to control the FIFA 22 ball in real-time, while creating an intuitive feel and unpredictability.**
