As the title says, this game is like Pain (it even has a similar name), but it has different gameplay in a funny way. In the game there are 6 kinds of monsters of the apocalypse. In each level there are 3 types of enemies (ground, air and water). Each of them has a different health bar. Try to kill them all as soon as you can. The more you kill the higher your score. You have infinite ammo so do not worry. You do not have to reload before fire, as long as you can shoot your

enemies. If you want to be really good, you can slow down time to try not to get killed. Requirements: You have to have Android 4.3 or higher. I can give a notification if you ask me. You need to download 4GB of space for the game to run. Thanks so much for watching! If you want more support or more anything about my channel you can contact me through Twitter, Facebook or Reddit. I tried this game for my completions in which the zombies are super realistic and it's amazing to play because of that. The only problem that I encountered with the gameplay was the GUI itself. They're not that well designed and hard to navigate when you're playing your first hour or two. They've improved it a bit but you
