With this application you can recover information from flash cards, optical drives and hard drives. The program can work with disk images. The application allows you to recover deleted or erased files. You can browse and select the files that you want to recover. The program can save recovered files to your hard drive. In most cases, the program recovers all data, but sometimes it does not help. Also, you can create and restore snapshots when the information is stored on a USB flash drive. This allows you to check and correct errors in the file system. The application supports most USB flash drives and USB-HDDs.
