## Free Airline Scheduling Software

my company is no stranger to flight planning software, we used flight planning software for many years, but have always found it confusing and difficult to manage. we loved the fact that we could access it from anywhere, but what we really liked about flight planning software was the ability to track the status of the jobs. i had a pilot enter jobs in the past, but now, all of the jobs are entered by a company scheduler. with a unified system like this, it is easy to keep track of the status of the jobs. flight scheduling software is the only solution which enables you to make the schedule work for you. leon is the only flight scheduling software that gives you the ability to manage your schedule by assigning tasks to members of your team. it has the most advanced online scheduling software features which are specifically designed for the aviation industry. it includes an aircraft reservation management system, full task management, online scheduling, online crew management, online flight planning, and online reporting for all your business aviation needs. flight planning software lets you enter and manage reservations, itineraries, frequencies, and gates. additionally, it gives you the flexibility to create custom reports. it also has the ability to book reservations in blocks, allowing you to book multiple reservations at once for a discounted rate. i had the opportunity to work with several flight scheduling systems in my career; i have never found any tool really adapted to business aviation until i came across leon. simplicity, flexibility and efficient automation of the communication between all departments of the company, not to mention the customer support! the team is reactive, pleasant to talk to and open to any questions and suggestions. in other words, i met the tool corresponding to my philosophy in this business. 5ec8ef588b
