With Harry Potter and the Deathly Hallows in the vault, it's fair to say that the series' final chapter is here. This means that it's time to say goodbye to Harry and the rest of his friends on this mortal plane. Although Harry Potter fans might be disappointed with this review, I'm still a little put off by how Harry and his friends have been portrayed in the series. As a boy, we were entranced by the wizarding world and the possibilities. It was a fantastic escape from the humdrum of everyday life. That's why the Hogwarts series has come to be so popular. As an adult, our minds have begun to grow more cynical and critical. It's difficult for modern audiences to accept the real world and the harsh realities that the books have avoided. 'Twill be interesting to see if the non-linear narrative of the final book in a series impacts how future movies are made, or if they continue to stick to the tried and true linear path of what has worked in the past. However, nothing beats hearing the opening piano notes of your own favourite (or most loved) classical tune. That might be something that a little music appreciation training at school might have benefited you with. I wonder if I'll do a review of the Zhou Enlai Suite next! Overall, I think Adobe's efforts in the area of general image editing that Adobe Photoshop has been a little disappointing. Lightroom is quick, easy to use, much better handling of problems like white balance, allows you to easily create new custom presets, and much more. The western photographic art of filtering and dodging is what makes Photoshop so terrific today. And with the iPhone 5s having a better sensor, more advanced camera application, and the ability to run it in OS X, I'd hope that Adobe would make it even better. I also think that it's sad that the iPad Pro with its Pencil is basically the same as the Lightroom app and Photoshop Sketch for the 12.9-inch iPad Pro. While there is definitely room for improvement in Photoshop over Lightroom and the 12.9-inch iPad Pro, Lightroom + iPad Pro is by far the best combination for my workflow.
