I have a function with a complex loop that should be done in parallel: import numba as nb import numpy as np @nb.njit def compute\_sum(m, n, zero=None): if zero is None: zero = np.zeros(m) sum\_1 = np.zeros(m) sum\_2 = np.zeros(m) for i in range(m): for j in range(n): sum\_1[i] += zero[i] sum\_2[i] += zero[i] sum\_1[i] += sum\_2[i] sum\_2[i] = zero[i] return sum\_1 I have no knowledge of GPUs so I have been trying to figure out how to use numba.jit.FloatX, since I have heard that it is the easiest way to do things on GPU with numba. I tried to use it like this: from numba import jit,float32 @nb.njit(float32(float32)) def compute\_sum\_gpu(m, n, zero=None): if zero is None: zero = np.

Quickly make a multimedia project - create your own slideshows, digital photo books, photo collages and photo calendars with the help of this tool. Create your own slideshows with the help of this multimedia tool. The presentation tool allows you to include an unlimited number of slide shows on your computer, and to make them interactive. Additionally, it allows you to view the slides in a multimedia-style, so as to present it on a CD, DVD or USB Flash Drive. After the release of this tool, we have received many requests for an evaluation version of the new Express product. For that reason, we have decided to release an evaluation version of the new Express product. The evaluation version comes with the same features as the production version. However, this version is limited to 30 days. It has all the functionalities of the production version, but a limited license to the selected templates. Here's a list of the included templates: - Calendar - Wallpaper - Photo Calendar - Photo Album - Photo Book - Business Card - Selfie Self-Portrait - Website - Photo slideshow What's New in Express v5.5: - Improved design and UI - Improved scheduling functionality - Improved QR code reader - Improved import functionality - Bug fixes - Improved camera format detection - Improved image resize - Improved monitor and screen format support - Added multiple photo book and slideshow templates - Various other improvements After the evaluation period expires, you'll automatically be upgraded to the production version. Documentation Plain text formatting Of course, it's also the most widely used form of content in blogs, webpages and other types of documents. But it's not always the most visually appealing option. With FormatText, you can easily apply a certain format to your text without much effort. It features a streamlined interface, and also allows you to easily apply all the available text formatting options, including margins, indents, white space and even a bulleted list. Here are some examples of how the text formatting tool works: • Apply the same formatting to multiple words or lines • Apply margin, indent, and the bullets • Apply color schemes (available themes include black, white, red, blue, and green) • Apply headers, subheaders, and indentation • Replace a portion of the text • Create a table • Apply line breaks • Compress 2edc1e01e8

## Muvee Photo Creations With Registration Code X64

muvee Photo Creations is a simple to use program, dedicated to helping you create a multitude of digital photo albums and other types of compilations. The software allows you to create photo projects then send them to the printer, in order to obtain professionally looking products. You may also save the projects to your computer. Creation wizard With muvee Photo Creations, generating digital photo compilations is made easy: all you need to do is select the type of project you wish to create, then follow the wizard. The software allows you to create photo books, albums, calendars, greeting cards and gallery wraps. Each project can be made with the help of a wizard that guides you through each step of the process. From selecting page size to layout, number of photos, location and selecting the images you wish to insert in the album, the wizard covers all the creation steps. All you need to do is make a few mouse clicks, select the images, then obtain a professionally looking album, calendar or greeting card. Customize projects The software features a tab structure, meaning you can easily open several projects at a time, but only view one of them. You may switch between them, from the Open Projects button. The software can automatically create the front and back covers, but allows you full control over the containing pages: you may decide how to place them on the page, choose page layouts or backgrounds. The software also allows you to add picture borders, vignette effects, masks, clipart or templates. Each type of project features specific elements that you may customize for each project: for example, in case you create a calendar, you can specify the national holidays according to a series of countries, add captions to images or mark important events. High quality printing muvee Photo Creations is designed to help you create photo compilations, in the purpose of printing them. You may thus obtain professionally looking books, albums, calendars, greeting cards or gallery wraps. The software offers you several templates for each project, as well as an individualized creation wizard for each product category.
